DENTAL ASEPSIS for the Profession of Dental Technologists

“Without cleanliness there can be no assurance of safety”

MANDATE

Infection Control is the procedures a Health Care Provider is aware of to prevent the spreading of infections from clients to the professional or between patients and staff members. The Asepsis program will assist you to provide the highest standard of cleanliness possible not only for your work area but the entire office.

Many of the procedures may be common sense but as Health Care Providers under the HPA review is required, so that expectations and your responsibilities are clear. A detailed explanation of procedures will be covered.

Part of our service as Technologists and Technicians is to provide in house Technical support to our clients, as well as responding to the public's need with respect to repairs. So that a Professional presentation can be maintained for these clients a proper laboratory or clinical presentation must be maintained. Dental Laboratory Asepsis is an important component in protecting the Patient, Dentist and the entire Laboratory.
