Examination Summary

A large portion of the examination is to be completed as preliminary preparation prior to the examination date. Exam candidates will receive the full examination instructions at least 30 days prior to the examination date. Exam candidates are responsible to provide ALL exam supplies.

Exam Candidates are expected to complete all preliminary work independently.

Crown and Bridge

- 1. **Preliminary work**: Construct a 3-unit porcelain fused to metal fixed partial denture and apply opaque to receive porcelain at exam site.
- 2. **On site work:** Complete on site a 3-unit bridge framework wax-up to the above design specifications.
- 3. **Preliminary work:** Complete a single unit fully pressed crown (no substructure of any kind will be allowed for this crown). Crown will be pressed in advance and brought to exam site with sprue attached and ready to be cut off and fit onto die.
- 4. **On site work:** The crown is to receive and incisal cutback at exam site and porcelain is to be layered to complete contour and glazed.

Orthodontics

- 1. **On site work:** Construct a Maxillary appliance to correct cross-bite.
- 2. **On site work**: Construct a Maxillary Thumb sucking Crib.

Removable Full Prosthetics

- 1. **Preliminary work:** Maxillary and mandibular models with occlusal rims, mounted on a semi-adjustable articulator, for the construction of a complete maxillary and mandibular denture set-up ready for Try-in.
- 2. **Preliminary work:** Candidates are also to prepare for maxillary and mandibular processed dentures and made ready for deflasking.
- 3. **On site work:** The candidate is to bring suitable teeth on original tooth cards (1 x 28), perform a complete denture set up ready for try-in.

Removable Partial Prosthetics

1. **Preliminary work:** Construct a Partial Mandibular Denture:

- A cast showing the surveying, design
- A second cast with the design plus the relief and block out
- A duplicate cast, ready for waxing up on site
- An unfinished cast metal framework, still sprued and sandblasted to be finished on site
- An opposing articulated cast, ready for wax setup
